

Hands on Training on Arduino Under Competency Enhancement Program

School of ECE have started Competency Enhancement Program. Under this program Prof. Md Tauseef, Assistant Professor School of ECE, is giving Hands-on-Training on Arduino Microcontroller Development Board. The vision of this training program is to develop and promote the spirit of science and technology to students, enabling them to have hands-on feels of technology and its application. This training program is a weekly program, every week a new batch is going to be started and is conducted after college working hours from 4.15pm to 6.15pm.

The first batch was started on 29 Feb 2016, students & faculties got trained under this program. This batch got successfully completed on 4 March 2015.
