

FDP conducted on "Systems Approach to solutions Engineering". in School of ECE on 01st April 2016

A faculty Development Program was arranged by Prof. Jayaraman in Room Number 213 at 9 Am on 01 st April, 2016" Systems Approach solutions Engineering".

All the faculty attended the FDP. Prof Jayaraman discussed a system approach is a must for all prospective Engineers who want to excel in their profession in the changing world. Systems way of thinking to evolve solution to small to large challenges will be the need of the day. The topic would help everyone to change their view to simplify solutions Engineering and make them more productive in their profession.

A real time examples were given. If a customer gives the need, then the design engineer must see to all the constraints, like designing system, effect of environmental factors on inputs, etc. The design must account for extraneous factors. It was a chalk and talk sessions.

Director sir also stressed upon that all teachers need to percolate this information to the students and ended with thanks giving note by Director.
