At School of EEE, we have invited the parents of the graduated students who have received the degree on 4th August 2016 to our EEE School and interacted with them. Myself and Dr. B.P. Divakar, explained about the proceedings of the M.Tech course how it was conducted with the help of EEE faculties during last two years.

Few of the expressions from the parents are:

1) All the parents have expressed the happiness about the arrangements made during the convocation and also the hospitality provided by all staff of REVA University.
2) The parents of Mr. Pavan Hiremath (gold medalists) have told that the gold medal got by his son is because of the effort rendered by all the faculties of School of EEE. Their son was very much passionate towards attending the classes and was spending very less time in their home (which is in Dharwad).
3) Many parents have expressed their happiness in the knowledge gained by their children at REVA University during the course of time.
4) Few of the parents have expressed about including actual practical exposure with industry tie up. We have explained that our syllabus is framed based on industrial application and teaching the students relating with practical application. But in future we will try to tie up with industry for providing actual practical exposure to the students.
5) Finally all the parents have expressed their gratitude to the Chancellor sir for establishing such a marvelous Institute and facilities where their children were graduated.

These are only few abstracts of the discussions but they expressed lot many things about the positive aspects of REVA University.
