HDMI

HDMI stands for High Definition Multimedia Interface and is the most frequently used in REVA University for HD signal for transferring both high definition audio and video over a single cable to a TV or projectors

HDMI is also featuring on laptops, PCs and projectors becoming a standard for education, presentation to transmit signals from device to device

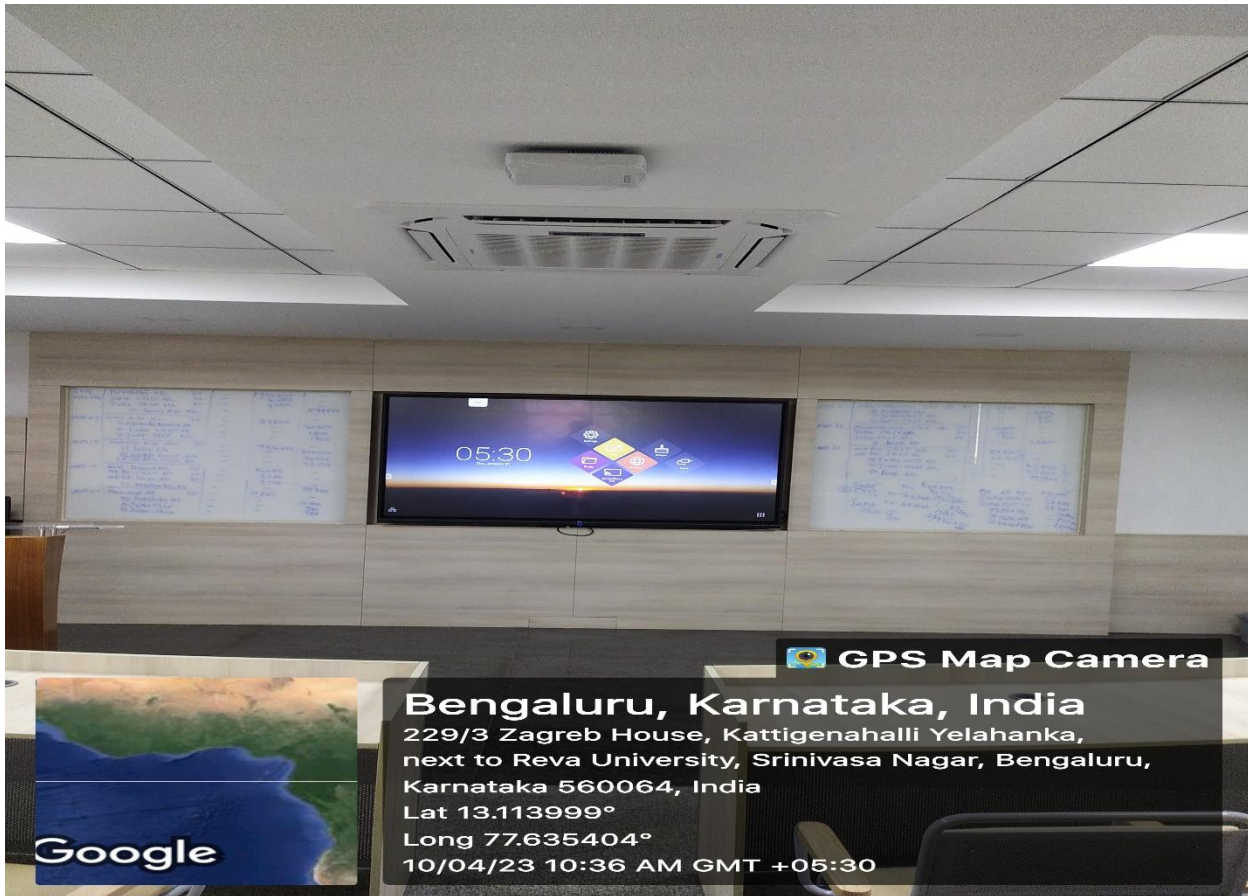

SMARTBOARD

Smart REVA University has started adopting digital board for teaching in place of the traditional black and whiteboards. Digital board is an interactive screen that displays text, images, videos, etc., which helps students visualize content better and also provides a foundation for a healthy classroom atmosphere.

The availability of the internet with Digital boards offer students easy access to all the available online resources. Digital boards are receptive to touch, so it allows teachers to draw and write

Digital whiteboards allow you to use several tools to capture students' attention. It keeps students engaged. Using videos, images, and other media tools on digital boards helps explain concepts to the students better. Moreover, the visual representation helps them understand and retain those concepts better.

PROJECTORS

REVA university enables fantastic environment for teaching, the projectors are installed in class rooms/seminar halls assisting professors as a visual aid and boosting student engagement. Projectors are installed at wide range of throw distances and flexible mounting options

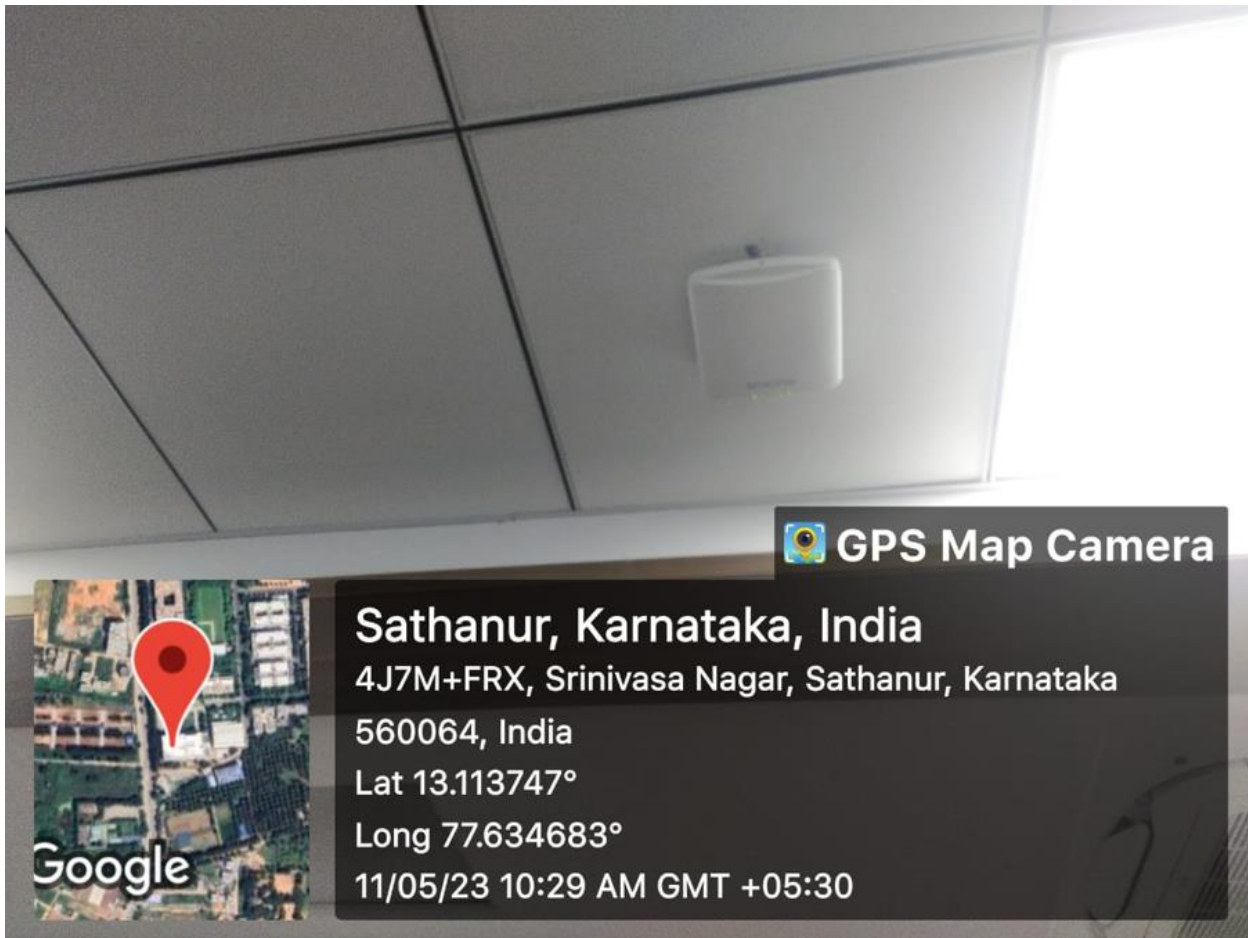

Projectors installed in Campus are capable of fine-tuning out of various light sources to empower every kind of educators and students. They can therefore teach/learn, create, and define their own success.

WIFI NETWORK

REVA University has Wi-Fi facility across the campus, WiFi networks provide the convenience of staying connected without a wired Ethernet connection. An exceptional WiFi experience powered by an advanced wireless modem with managed network capabilities and advanced security to support all the ways you use the internet.

Wifi devices installed class rooms and corridors across the campus delivery blazing performance, with high data rates and with ability to reject interference and signal quality from any devices.
