AUDIO VISUAL FACILITY

REVA University offers learning techniques by providing the Audio-Visual centre to students, ensures that every student, irrespective of their background, is treated equally in terms of the equipment and learning techniques that they have access to, making the entire class subject to the good outcomes of the faculty's hard work. The students are provided with accent neutralization training, a deeper understanding of phonetics, and several other real-life skills like interview and presentation skills. The lessons are not limited to merely theoretical jargon; the students are encouraged to practically display and improve their skills by taking part in group discussions, putting up skits that involve role-playing, and making presentations. The takeaways that the students receive from these activities benefit them greatly in terms of placements and competitive exams. The final objective is to mould these students into confident orators, writers, and leaders. They are able to transmute these skills into real-life skills making them a lot more confident in the corporate fields, their areas of work, interpersonal communication, as well as day to day communication. These activities aim to improve the students' fluency in the English language and ensure that they graduate with the confidence they require to communicate in this day and age.
