

# Workshop on IoT Bootcamp for the BS Computing 3 Year Students at School of CSA

School: Computer Science and Applications

Venue: Classroom 420

Date: 8th March to 13th March

Year: 2021

The objective of the program was to teach Internet of Things (IoT) & make the students to develop some working models / projects on their own.

IoT is a process of communicating effectively and securely with machines. In today's world more than 35+ billion devices are connected using IoT & it is speculated that by year 2030, the number is expected to increase upto 125 billion. There is a huge potential growth potential for this technology in various markets such as industrial appliances, defence sector, Medical equipment, retail sector, agriculture sector, home appliances etc.

Ethicalbyte Trainer provided greater value to students by providing them not only the most updated courses but also preparing them is taking online assessment exam that empower students to face Interview confidently during placements drive. The trainer also taught the best practices and latest techniques & tricks in coding. They also learned architecture & protocols, Arduino & Rasberry Pi, Cooja simulator, IoT Cloud & Security.

The classes were conducted in the class rooms for 6 days (32 hours) and students had appeared for an assessment examination on the last day of the event. The outcome of the event was students learned how to develop projects such as , 3 factor authentication, Monitoring server, Satellite tracker, GPS tracker, Car dashboard etc.

Pictures are attached below taken during the event which clearly shows the activeness of the trainer and the attentiveness of the Students.

Organises Skill Development Programme on

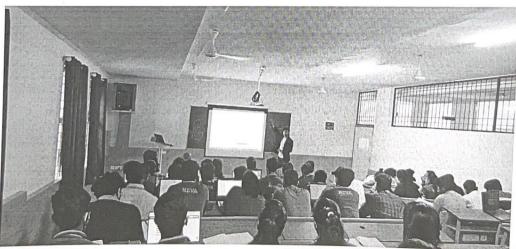

# **IOT-BOOTCAMP**

(for 6th Semester Bsc-CSA)

Date: 8th to 13th March, 2021 Time: 8:30 A. M. to 4:30 P. M.

www.reva.edu.in

#### Feedback

- I had done research on various aspects while performing my role in completing my project(3 factor authentication door) and I will use those skills (observation,teamwork, listening) which I gained from my project completion.
- Will help me understand better and learn faster
- Practical sessions were helpful. Will definitely implement what I learnt here in the future.
- Working on ethical hacking, IOT will be useful in terms of knowing about the hardware requirements.
- I will try to explore more about internet of things more
- Had a good experience about how to manage time to complete the given project.
- Since it's IOT there are many possibilities and endless implementations.
- Without the support of Manoj Kashyap sir, it would be uphill task for our team to complete the project. Most of the credits goes to Manoj sir.

- Proper knowledge about the components used for projects were not briefed by the trainer.
   We had to gain the knowledge by ourselves before getting into the project.
- Overall good experience

Subject: Acknowledge for the Skill development certificate.

Dear Sir,

With reference to the above cited subject, we acknowledge you that the students received digital certificate for the skill development course done. The students who are all eligible for the certification are listed below.

The Sample of the certificate is attached.

#### Workshop on IoT Bootcamp for the MCA 2<sup>nd</sup> Year Students at School of CSA

School: Computer Science and Applications Section A & B

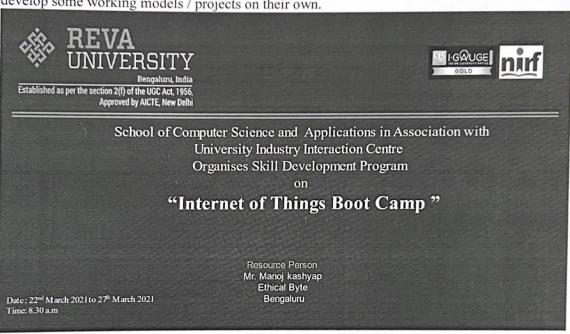

Venue: Classroom

Date: 15th March to 20th March (Sec-A) & 22nd March to 27th March (Sec-B)

Year: 2021

The objective of the program was to teach Internet of Things (IoT) & make the students to

develop some working models / projects on their own.

IoT is a process of communicating effectively and securely with machines. In todays world more than 35+ billion devices are connected using IoT & it is speculated that by year 2030, the number is expected to increase upto 125 billion. There is a huge potential growth potential for this technology in various markets such as industrial appliances, defence sector, Medical equipment. retail sector, agriculture sector, home appliances etc.

Ethicalbyte Trainer provided greater value to students by providing them not only the most updated courses but also preparing them is taking online assessment exam that empower students to face Interview confidently during placements drive. The trainer also taught the best practices and latest techniques & tricks in coding. They also learned architecture & protocols, Arduino & Rasberry Pi, Cooja simulator, IoT Cloud & Security.

> **REVA University** Bengaluru - 560 064

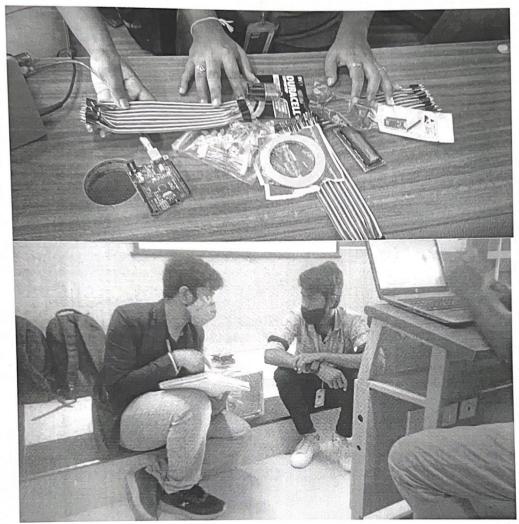

The classes were conducted in the class rooms for 6 days (32 hours ) and students had appeared for an assessment examination on the last day of the event. The outcome of the event was students learned how to develop projects such as , Drone , personalized room automation , Vertical farming ,Covid Test Sample isolation ,Crypto wallet, Blind logger, Laptop Power bank, oximeter, Repeater etc .

Pictures are attached below taken during the event which clearly shows the activeness of the trainer and the attentiveness of the Students.

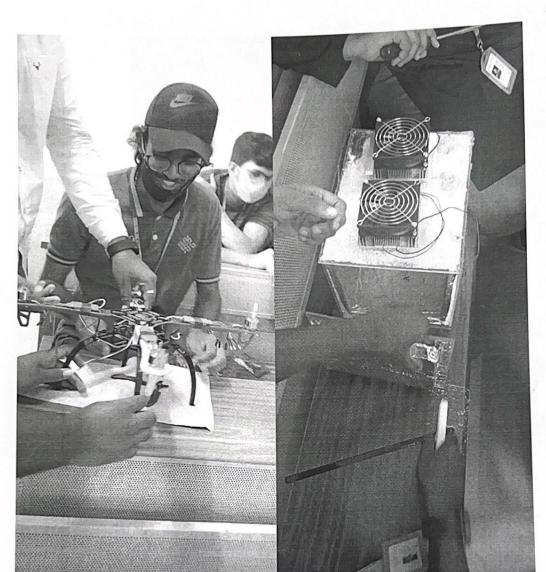

Feedback:

Good

Its good

Based on training we have done project and it was useful session

It will improve my skill in IOT
